Reveal The Beauty of Concrete

Bomanite Exposed Aggregate Systems bring the vintage decorative concrete option back into the forefront of the industry with innovative systems, longer-lasting products, and a variety of mix designs that combine the durability you need with the beauty you desire. Today, with new technology and inventive products, novel exposed aggregate finishing options have emerged from Bomanite Corporation to breathe new life into the aged decorative concrete technique of rustic terrazzo. With a variety of modernized mixes and an unlimited palette of colors, textures and aggregate options to choose from, Bomanite Exposed Aggregate Systems offer three cost-effective solutions that are more durable than ever and reveal just how brilliant exposed concrete can be.

Bomanite®

EXPOSED AGGREGATE SYSTEMS

Imagine The Possibilities.

Sandscape Texture™ by Bomanite is designed for outdoor applications where an alternative to a conventional concrete finish is required. Utilizing advanced application procedures and specialized mix designs, Sandscape Texture is a green, consistent alternative to sand blasted concrete. Sandscape Texture can incorporate specialized light fast colored sands and/or natural graded aggregates in the concrete mix to achieve a broader palette of color. Used in combination with Bomanite Imprint Systems and having a variety of color and staining options to choose from, Sandscape Texture by Bomanite creates consistent texture and durable hardscapes ideal for plazas, walkways, shopping centers, schools and more.

Aggretex® by Bomanite utilizes a proprietary mixture of powders to which custom decorative aggregates are added. Aggretex by Bomanite creates an aggregate-containing cementitious layer that permanently secures the decorative aggregates there-in, with a portion of the aggregate exposed. The resulting finish is comparable in durability to stone or terrazzo. Field blended in a multitude of colors with exposed fine stone, glass or other exotic aggregate blends, the design options are endless for creating the custom look you desire. This durable, single pour system allows for installation in highly decorative areas such as where marble or granite would be utilized. With the aggregate mixed into the Aggretex prior to pouring, a more even, consistent finish will result and increase the lifespan of the decorative surface.

LifeTime Floors Revealed™ by Bomanite is a sustainable finishing option that incorporates unique granite and marble aggregates with a color blending process and traditional technology of exposing the aggregates. LifeTime Floors Revealed offers a wide range of factory blended standard colors and aggregates to choose from to enhance any project. Designed for outdoor applications in public areas, this topping installation is engineered for monolithic pours with high-strength performance. The pronounced decorative finish is a sustainable option where low-maintenance, slip resistance and a highly decorative concrete surface is desired.
